JOURNAL OF GUIDANCE, CONTROL, AND DYNAMICS
Vol. 22, No. 6, November–December 1999

1999 *Journal of Guidance, Control, and Dynamics* Index

How to Use the Index

In the Subject Index, pages 925–929, each technical paper is listed under a maximum of three appropriate headings. Note the number in boldface type following each paper title, and use that number to locate the paper in the Chronological Index. The Author Index, page 930, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 931–935, lists all papers by their unique code numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based, as well as the ISBN number if the paper was published in a bound collection of meetings papers. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 1999, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index. The Book Review Index, page 936, lists the books reviewed during 1999, the author, publisher, and reviewer, and the volume, issue number, and page on which the review appeared.

Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aeroelasticity and Aeroservoelasticity

Uncertainty Modeling for Multivariable-Control Robustness Analysis of Elastic High-Speed Vehicles **G99-010**
Flutter Boundary Prediction Using Physical Models and Experimental Data **G99-022**
Design of Notch Filters for Structural Responses with Multiaxis Coupling **G99-049**

Aerospace Plane

Uncertainty Modeling for Multivariable-Control Robustness Analysis of Elastic High-Speed Vehicles **G99-010**

Communication and Air Traffic Control

Optimization and Coordination of Multiagent Systems Using Principled Negotiation **G99-005**

Flight Control Integration

Practial View of Redundancy Management Application and Theory **G99-001**
Efficient, Near-Optimal Control Allocation **G99-054**

Flight Mechanics

Does the Phugoid Frequency Depend on Speed? **G99-055**
Two-Timescale-Integration Method for Inverse Simulation **G99-060**

Flight Operations

Optimization and Coordination of Multiagent Systems Using Principled Negotiation **G99-005**

Powerplant Integration

Robust Integrated Flight and Propulsion Controller for the Harrier Aircraft **G99-041**

Rotorcraft

Adaptive Model Inversion Flight Control for Tilt-Roter Aircraft **G99-061**
Identifying Helicopter Control Gains Using Desired Output Histories **G99-074**

Simulation

Off Line Comparison of Classical and Robust Flight Simulator Motion Control **G99-107**
Longitudinal Landing Control Law for an Autonomous Reentry Vehicle **G99-123**

STOL/VTOL/STOVL

Robust Integrated Flight and Propulsion Controller for the Harrier Aircraft **G99-041**

System Effectiveness

Evaluation of Collision Avoidance Maneuvers for Parallel Approach **G99-124**

Testing, Flight and Ground

Longitudinal Landing Control Law for an Autonomous Reentry Vehicle **G99-123**

Vibration

Vibration Confinement in a Generic Launch Vehicle **G99-077**

Weather Hazards

Windshear Recovery Using Fuzzy Logic Guidance and Control **G99-025**

Fluid Dynamics

Hydrodynamics

Finite Dimensional Optimal Control of Poiseuille Flow **G99-048**

Guidance, Control, and Dynamics Technology

Aircraft Dynamics

Robust Control of Nonlinear Systems Using Model-Error Control Synthesis **99-090**
Increase and Limit of $T_{\theta 2}$ in Super- and Hypersonic Flight **G99-026**
Does the Phugoid Frequency Depend on Speed? **G99-055**
Two-Timescale-Integration Method for Inverse Simulation **G99-060**
Robust Control of Nonlinear Systems Using Model-Error Control Synthesis **G99-090**
Synthesis of Nonlinear Controller to Recover an Unstable Aircraft from Poststall Regime **G99-108**

Aircraft Guidance

Strapdown Inertial Navigation Integration Algorithm Design Part 1: Attitude Algorithms **G98-002**
Autonomous Maneuver Tracking for Self-Piloted Vehicles **G99-007**
Optimal Finite Thrust Orbit Transfers with Large Numbers of Burns **G99-016**
Discrete-Time Optimal Guidance **G99-023**
Sensitivity of Trajectory Prediction in Air Traffic Management **G99-033**
Experimental Studies of Intent Information on Cockpit Traffic Displays **G99-080**

Aircraft Stability and Control

Autonomous Maneuver Tracking for Self-Piloted Vehicles **G99-007**
Simultaneous Guaranteed-Cost Vector-Optimal Performance Design for Collections of Systems **G99-011**
Design of Automatic Landing Systems Using Mixed H_2/H_∞ Control **G99-012**
Optimal Strategies for Free-Flight Air Traffic Conflict Resolution **G99-031**
Design of Notch Filters for Structural Responses with Multiaxis Coupling **G99-049**
Optimal Control and Filtering for Nonstandard Singularly Perturbed Linear Systems **G99-052**
Efficient, Near-Optimal Control Allocation **G99-054**
Does the Phugoid Frequency Depend on Speed? **G99-055**
Solving Control Allocation Problems Using Semidefinite Programming **G99-075**

Robust Control of Nonlinear Systems Using Model-Error Control Synthesis G99-090
Horizontal Control Effector Sizing for Supersonic Transport Aircraft G99-095
Synthesis of Nonlinear Controller to Recover an Unstable Aircraft from Poststall Regime G99-108
Unified Approach for Roll Ratcheting Analysis G99-109
Design Technique for a Linear System with an Amplitude-Constrained Actuator G99-114
Aircraft Handling Qualities and Pilot-Induced Oscillation Tendencies with Actuator Saturation G99-131
Multiple Timescale Flight Control Using Reconfigurable Sliding Modes G99-133
Do All Linear Flexible Structures Have Convergent Second-Order Observers? G99-136
Worst-Case Control for Discrete-Time Uncertain Nonlinear Systems G99-139

Artificial Intelligence

Optimization and Coordination of Multiagent Systems Using Principled Negotiation G99-005
Gain-Scheduled Control Using Fuzzy Logic and Its Application to Flight Control G99-024
Windshear Recovery Using Fuzzy Logic Guidance and Control G99-025
Experiments on Space Robot Arm Path Planning Using the Sensors Database G99-087
Action Selection Algorithms for Autonomous Microspacecraft G99-140

Astrodynamics

Evaluation of the Naval Space Surveillance Fence Performance Using Satellite Laser Ranging G99-017
Simple Strategy for Powered Swingby G99-018
Artificial Lagrange Points for a Partially Reflecting Flat Solar Sail G99-028
Short-Term Debris Risk to Large Satellite Constellations G99-042
Autonomous Low-Earth-Orbit Determination from Magnetometer and Sun Sensor Data G99-043
Autonomous Orbit Determination for Two Spacecraft from Relative Position Measurements G99-044
Propulsion System Sizing for Orbital Inspection Vehicles G99-057
Two-Body Optimization for Deflecting Earth-Crossing Asteroids G99-063
Minimum-Time Low-Thrust Rendezvous and Transfer Using Epoch Mean Longitude Formulation G99-064
Feedback Control for Spacecraft Rendezvous and Docking G99-092
Minimum-Fuel Escape from Two-Body Sun-Earth System G99-097
Optimal Low-Thrust Escape Trajectories Using Gravity Assist G99-098
Classification of Out-of-Plane Swing-By Trajectories G99-099
Multiple-Spacecraft Orbit-Transfer Problem: The No-Booster Case G99-100
Floquet Approximation for a Nearly Axisymmetric Rigid Body with Constant Transverse Torque G99-101
Improved Performance of Recursive Tracking Filters Using Batch Initialization and Process Noise Adaptation G99-104
Time-Optimal Control of Axisymmetric Rigid Spacecraft Using Two Controls G99-105
Simple Approach to East–West Station Keeping of Geosynchronous Spacecraft G99-115
Catalog Maintenance of Low-Earth-Orbit Satellites: Principles of the Algorithm G99-118
Multiple-Spacecraft Orbit Transfer Problem: Weak-Booster and Strong-Booster Cases G99-135
Generalized Canonical Systems Applications to Optimal Trajectory Analysis G99-142

Avionics Systems

Strapdown Inertial Navigation Integration Algorithm Design Part 1: Attitude Algorithms G98-002

Control System Design

Practial View of Redundancy Management Application and Theory G99-001
Autonomous Maneuver Tracking for Self-Piloted Vehicles G99-007
Full Envelope Missile Autopilot Design Using Gain Scheduled Robust Control G99-013
New Design Method for Pulse-Width Modulation Control Systems via Digital Redesign G99-014
Expected Residual Vibration of Traditional and Hybrid Input Shaping Designs G99-020
Discrete-Time Optimal Guidance G99-023
Gain-Scheduled Control Using Fuzzy Logic and Its Application to Flight Control G99-024
Windshear Recovery Using Fuzzy Logic Guidance and Control G99-025
Optimal Strategies for Free-Flight Air Traffic Conflict Resolution G99-031
Comparison of μ- and $\mathcal{H}_2$-Synthesis Controllers on an Experimental Typical Section G99-040
Robust Integrated Flight and Propulsion Controller for the Harrier Aircraft G99-041
Adaptive Control of Electrically Driven Space Robots Based on Virtual Decomposition G99-047
Finite Dimensional Optimal Control of Poiseuille Flow G99-048
Design of Notch Filters for Structural Responses with Multiaxis Coupling G99-049
Application of the Nyquist Stability Criterion on the Nichols Chart G99-051
Optimal Control and Filtering for Nonstandard Singularly Perturbed Linear Systems G99-052
Generalized Plants for $\mathcal{H}_\infty$ Robust Controller Design G99-053
Adaptive Model Inversion Flight Control for Tilt-Roter Aircraft G99-061
Robust Adaptive Control of Store Release Event for Wings with External Stores G99-062
Nonlinear Digital Scheme for Attitude Tracking G99-069
Controller Design of Periodic Time-Varying Systems via Time-Invariant Methods G99-071
Identifying Helicopter Control Gains Using Desired Output Histories G99-074
Vibration Confinement in a Generic Launch Vehicle G99-077
Gain-Scheduled Linear Fractional Control for Active Flutter Suppression G99-078
Uncertainty Modeling in Aerospace Flexible Structures G99-093
Weighted-Residual Discretization for Uniform Damping and Uniform Stiffening of Structural Systems G99-094
Stability and Control of an Atmospheric Tether with a Lifting Probe G99-102
System Identification and Adaptive Steering of Tractors Utilizing Differential Global Positioning System G99-103
Off-Line Comparison of Classical and Robust Flight Simulator Motion Control G99-107
Synthesis of Nonlinear Controller to Recover an Unstable Aircraft from Poststall Regime G99-108
Eigenstructure Assignment Algorithm for Mechanical Second-Order Systems G99-113
Design Technique for a Linear System with an Amplitude-Constrained Actuator G99-114
Band-Limited Actuator and Sensor Selection for Disturbance Rejection G99-117
Longitudinal Landing Control Law for an Autonomous Reentry Vehicle G99-123
Application of Parameter-Dependent Robust Control Synthesis to Turbofan Engines G99-128
Low-Authority Controller Design by Means of Convex Optimization G99-132
Multiple Timescale Flight Control Using Reconfigurable Sliding Modes G99-133
Unified Design for H_2, H_∞, and Mixed Control of Spacecraft G99-134
Do All Linear Flexible Structures Have Convergent Second-Order Observers? G99-136

Control System Effectors

Selective Modal Transducers for Piezolaminated Anisotropic Shells G99-068
Horizontal Control Effector Sizing for Supersonic Transport Aircraft G99-095

Control Theory

Uncertainty Modeling for Multivariable-Control Robustness Analysis of Elastic High-Speed Vehicles G99-010
Simultaneous Guaranteed-Cost Vector-Optimal Performance Design for Collections of Systems G99-011
Design of Automatic Landing Systems Using Mixed H_2/H_∞ Control G99-012
$\mathcal{H}_\infty$ Bounded Fault Detection Filter G99-015
Stability Analysis of Baumgarte Constraint Stabilization Technique in Multibody Dynamic Systems G99-019
Gain-Scheduled Control Using Fuzzy Logic and Its Application to Flight Control G99-024
Sliding Mode Control of Mechanical Systems with Bounded Disturbances via Output Feedback G99-035
Creating Time-Optimal Commands with Practical Constraints G99-036
Model Reduction with a Finite Horizon H_∞ Criterion G99-037
Nonlinear Projection Filter Based on Galerkin Approximation G99-038

Adaptive Control of Electrically Driven Space Robots Based on Virtual Decomposition G99-047
Application of the Nyquist Stability Criterion on the Nichols Chart G99-051
Optimal Control and Filtering for Nonstandard Singularly Perturbed Linear Systems G99-052
Direct Adaptive Control for Gravity-Turn Descent G99-056
Controller Design of Periodic Time-Varying Systems via Time-Invariant Methods G99-071
Model Reduction of Large Space Structures Using Approximate Component Cost Analysis G99-084
Dissipator Placement Design for Truss Structures via Balancing Theory G99-085
Robust Control of Nonlinear Systems Using Model-Error Control Synthesis G99-090
Weighted-Residual Discretization for Uniform Damping and Uniform Stiffening of Structural Systems G99-094
System Identification and Adaptive Steering of Tractors Utilizing Differential Global Positioning System G99-103
Robustness Analysis of Neural Networks with an Application to System Identification G99-106
Linear Quadratic Optimality of Infinite Gain Margin Controllers G99-110
Design Technique for a Linear System with an Amplitude-Constrained Actuator G99-114
Robust Fault Diagnosis for a Class of Linear Systems with Uncertainty G99-116
Spacecraft Spin Stabilization Using a Transverse Wheel for Any Inertia Ratio G99-120
Regulation About Time-Varying Trajectories: Precision Entry Guidance Illustrated G99-122
Robust Failure Detection for Reentry Vehicle Attitude Control Systems G99-129
Multiple Timescale Flight Control Using Reconfigurable Sliding Modes G99-133
Worst-Case Control for Discrete-Time Uncertain Nonlinear Systems G99-139

Differential Games

Minimum-Phase Robustness for Second-Order Linear Systems G99-034
Unified Design for H_2, H_∞, and Mixed Control of Spacecraft G99-134

Dynamics

Efficient Simulation of Motions Involving Coulomb Friction G99-009
Stability Analysis of Baumgarte Constraint Stabilization Technique in Multibody Dynamic Systems G99-019
Asymmetric Body Spinning Motion with Energy Dissipation and Constant Body-Fixed Torques G99-046
Closed-Form Methods for Generating On–Off Commands for Undamped Flexible Spacecraft G99-058
Dynamic System Characterization via Eigenvalue Orbits G99-067
New Constraint Stabilization Technique for Dynamic Systems with Nonholonomic Constraints G99-076
Modeling of Variable Length Towed and Tethered Cable Systems G99-091
Floquet Approximation for a Nearly Axisymmetric Rigid Body with Constant Transverse Torque G99-101
Resonated Libration of Tethered Subsatellite by Atmospheric Density Variation G99-138
Effects of Planar Thrust Misalignments on Rigid Body Motion G99-141

Engine Control

Application of Parameter-Dependent Robust Control Synthesis to Turbofan Engines G99-128

Flight Mechanics

Minimum-Time Low-Thrust Rendezvous and Transfer Using Epoch Mean Longitude Formulation G99-064

Handling Qualities

Adaptive Model Inversion Flight Control for Tilt-Roter Aircraft G99-061
Identifying Helicopter Control Gains Using Desired Output Histories G99-074
Development of the Probe-and-Drogue Handling Qualities Demonstration Maneuver G99-081
Unified Approach for Roll Ratcheting Analysis G99-109
Aircraft Handling Qualities and Pilot-Induced Oscillation Tendencies with Actuator Saturation G99-131

Information Processing

Bayesian Pattern Matching Technique for Target Acquisition G99-008
Evaluation of Collision Avoidance Maneuvers for Parallel Approach G99-124

Launch Vehicle Guidance and Control

Treatment of Control Constraints in Finite Element Solution of Optimal Control Problems G99-050
Regulation About Time-Varying Trajectories: Precision Entry Guidance Illustrated G99-122

Missile Dynamics

Adaptive Radome Compensation Using Dither G99-006

Missile Guidance and Control

Adaptive Radome Compensation Using Dither G99-006
Bayesian Pattern Matching Technique for Target Acquisition G99-008
Full Envelope Missile Autopilot Design Using Gain Scheduled Robust Control G99-013
Treatment of Control Constraints in Finite Element Solution of Optimal Control Problems G99-050
Bayesian Approach to Guidance in the Presence of Glint G99-070
Implementation of Optimal Guidance Laws Using Predicted Missile Velocity Profiles G99-088
Adaptive Sliding-Mode Guidance of a Homing Missile G99-089
Adaptive Two-Step Filter with Applications to Bearings-Only Measurement Problem G99-112
Attitude Commands Avoiding Bright Objects and Maintaining Communication with Ground Station G99-119
Trajectory Estimation of Reentry Vehicles by Use of On-Line Input Estimator G99-125

Navigation

Strapdown Inertial Navigation Integration Algorithm Design Part 1: Attitude Algorithms G98-002
Evaluation of the Naval Space Surveillance Fence Performance Using Satellite Laser Ranging G99-017
Formalized Approach to Obtaining Optimal Coefficients for Coning Algorithms G99-021
Autonomous Low-Earth-Orbit Determination from Magnetometer and Sun Sensor Data G99-043
Autonomous Orbit Determination for Two Spacecraft from Relative Position Measurements G99-044
Pseudolinear and State-Dependent Riccati Equation Filters for Angular Rate Estimation G99-111

Optimization Techniques

Simultaneous Guaranteed-Cost Vector-Optimal Performance Design for Collections of Systems G99-011
Expected Residual Vibration of Traditional and Hybrid Input Shaping Designs G99-020
Optimal Strategies for Free-Flight Air Traffic Conflict Resolution G99-031
Creating Time-Optimal Commands with Practical Constraints G99-036
Nonlinear Projection Filter Based on Galerkin Approximation G99-038
Treatment of Control Constraints in Finite Element Solution of Optimal Control Problems G99-050
Two-Body Optimization for Deflecting Earth-Crossing Asteroids G99-063
Initial Adjoint-Variable Guess Technique and Its Application in Optimal Orbital Transfer G99-073
Solving Control Allocation Problems Using Semidefinite Programming G99-075
Fuel- or Time-Optimal Transfers Between Coplanar, Coaxial Ellipses Using Lambert's Theorem G99-082
Optimal Aeroassisted Orbital Interception G99-096
Multiple-Spacecraft Orbit-Transfer Problem: The No-Booster Case G99-100
Time-Optimal Control of Axisymmetric Rigid Spacecraft Using Two Controls G99-105
Low-Authority Controller Design by Means of Convex Optimization G99-132
Multiple-Spacecraft Orbit Transfer Problem: Weak-Booster and Strong-Booster Cases G99-135

Pointing Systems

Pseudolinear and State-Dependent Riccati Equation Filters for Angular Rate Estimation G99-111
Attitude Commands Avoiding Bright Objects and Maintaining Communication with Ground Station G99-119

Redundancy Management

Practial View of Redundancy Management Application and Theory G99-001
$\mathcal{H}_\infty$ Bounded Fault Detection Filter G99-015
Efficient, Near-Optimal Control Allocation G99-054
Solving Control Allocation Problems Using Semidefinite Programming G99-075

Spacecraft Dynamics

Optimal Finite Thrust Orbit Transfers with Large Numbers of Burns G99-016
Efficient and Optimal Attitude Determination Using Recursive Global Positioning System Signal Operations G99-030

Global Positioning System Integer Ambiguity Resolution Without Attitude Knowledge G99-032
Short-Term Debris Risk to Large Satellite Constellations G99-042
Closed-Form Methods for Generating On–Off Commands for Undamped Flexible Spacecraft G99-058
Multiple Rigid-Body Reorientation Using Relative Motion with Constrained Final System Configuration G99-066
Nonlinear Digital Scheme for Attitude Tracking G99-069
Model Reduction of Large Space Structures Using Approximate Component Cost Analysis G99-084
Floquet Approximation for a Nearly Axisymmetric Rigid Body with Constant Transverse Torque G99-101
Spacecraft Spin Stabilization Using a Transverse Wheel for Any Inertia Ratio G99-120
Time-Domain Identification of Low-Order Models for Flexible Structures G99-137
Effects of Planar Thrust Misalignments on Rigid Body Motion G99-141

Spacecraft Guidance and Control

Synchronized Formation Rotation and Attitude Control of Multiple Free-Flying Spacecraft G99-003
New Design Method for Pulse-Width Modulation Control Systems via Digital Redesign G99-014
Optimal Finite Thrust Orbit Transfers with Large Numbers of Burns G99-016
Evaluation of the Naval Space Surveillance Fence Performance Using Satellite Laser Ranging G99-017
Efficient and Optimal Attitude Determination Using Recursive Global Positioning System Signal Operations G99-030
Global Positioning System Integer Ambiguity Resolution Without Attitude Knowledge G99-032
Electric Propulsion for Remote Sensing from Low Orbits G99-045
Generalized Plants for $\mathcal{H}_\infty$ Robust Controller Design G99-053
Direct Adaptive Control for Gravity-Turn Descent G99-056
Closed-Form Methods for Generating On–Off Commands for Undamped Flexible Spacecraft G99-058
Sequential Attitude and Attitude-Rate Estimation Using Integrated-Rate Parameters G99-059
Spacecraft Vibration Reduction Using Pulse-Width Pulse-Frequency Modulated Input Shaper G99-065
Multiple Rigid-Body Reorientation Using Relative Motion with Constrained Final System Configuration G99-066
Fuel- or Time-Optimal Transfers Between Coplanar, Coaxial Ellipses Using Lambert's Theorem G99-082
Optimal Combined Reaction-Wheel Momentum Management for Earth-Pointing Satellites G99-083
Experiments on Space Robot Arm Path Planning Using the Sensors Database G99-087
Feedback Control for Spacecraft Rendezvous and Docking G99-092
Time-Optimal Control of Axisymmetric Rigid Spacecraft Using Two Controls G99-105
Attitude Commands Avoiding Bright Objects and Maintaining Communication with Ground Station G99-119
Spacecraft Spin Stabilization Using a Transverse Wheel for Any Inertia Ratio G99-120
Regulation About Time-Varying Trajectories: Precision Entry Guidance Illustrated G99-122
Feedback Control for Slew Maneuver Using On–Off Thrusters G99-126
Unified Design for H_2, H_∞, and Mixed Control of Spacecraft G99-134
Action Selection Algorithms for Autonomous Microspacecraft G99-140
Effects of Planar Thrust Misalignments on Rigid Body Motion G99-141

State Estimation

Bayesian Pattern Matching Technique for Target Acquisition G99-008
Efficient and Optimal Attitude Determination Using Recursive Global Positioning System Signal Operations G99-030
Global Positioning System Integer Ambiguity Resolution Without Attitude Knowledge G99-032
Nonlinear Projection Filter Based on Galerkin Approximation G99-038
Autonomous Low-Earth-Orbit Determination from Magnetometer and Sun Sensor Data G99-043
Autonomous Orbit Determination for Two Spacecraft from Relative Position Measurements G99-044
Sequential Attitude and Attitude-Rate Estimation Using Integrated-Rate Parameters G99-059
Bayesian Approach to Guidance in the Presence of Glint G99-070
Improved Performance of Recursive Tracking Filters Using Batch Initialization and Process Noise Adaptation G99-104
Adaptive Two-Step Filter with Applications to Bearings-Only Measurement Problem G99-112
Robust Fault Diagnosis for a Class of Linear Systems with Uncertainty G99-116
Trajectory Estimation of Reentry Vehicles by Use of On-Line Input Estimator G99-125
Robust Failure Detection for Reentry Vehicle Attitude Control Systems G99-129
Optimal Reduced-Order Estimators for Parameter-Dependent Systems G99-130

Structural Control

Modelling and Control of a Flexible Structure Incorporating Inertial Slip-Stick Actuators G99-004
Expected Residual Vibration of Traditional and Hybrid Input Shaping Designs G99-020
Minimum-Phase Robustness for Second-Order Linear Systems G99-034
Sliding Mode Control of Mechanical Systems with Bounded Disturbances via Output Feedback G99-035
Model Reduction of Large Space Structures Using Approximate Component Cost Analysis G99-084
Validation of an Integrated Modeling Methodology's Closed-Loop Performance Prediction Capability G99-086
Weighted-Residual Discretization for Uniform Damping and Uniform Stiffening of Structural Systems G99-094
Eigenstructure Assignment Algorithm for Mechanical Second-Order Systems G99-113
Active $\mathcal{H}_\infty$ Control of Sound Radiation from Thin Cylindrical Panels G99-121
Feedback Control for Slew Maneuver Using On–Off Thrusters G99-126
Low-Authority Controller Design by Means of Convex Optimization G99-132

System Identification

Independent Analysis of the Space Station Node Modal Test Data G99-002
Flutter Boundary Prediction Using Physical Models and Experimental Data G99-022
Robustness Analysis of Neural Networks with an Application to System Identification G99-106
Time-Domain Identification of Low-Order Models for Flexible Structures G99-137

Trajectory Optimization

Simple Strategy for Powered Swingby G99-018
Electric Propulsion for Remote Sensing from Low Orbits G99-045
Minimum-Time Low-Thrust Rendezvous and Transfer Using Epoch Mean Longitude Formulation G99-064
Initial Adjoint-Variable Guess Technique and Its Application in Optimal Orbital Transfer G99-073
Fuel- or Time-Optimal Transfers Between Coplanar, Coaxial Ellipses Using Lambert's Theorem G99-082
Experiments on Space Robot Arm Path Planning Using the Sensors Database G99-087
Minimum-Fuel Escape from Two-Body Sun-Earth System G99-097
Optimal Low-Thrust Escape Trajectories Using Gravity Assist G99-098
Classification of Out-of-Plane Swing-By Trajectories G99-099
Trajectory Estimation of Reentry Vehicles by Use of On-Line Input Estimator G99-125
Generalized Canonical Systems Applications to Optimal Trajectory Analysis G99-142

Interdisciplinary Topics

Aerospace Management

Sensitivity of Trajectory Prediction in Air Traffic Management G99-033

Analytical and Numerical Methods

Robustness Analysis of Neural Networks with an Application to System Identification G99-106

Human Factors

Experimental Studies of Intent Information on Cockpit Traffic Displays G99-080

Reliability, Maintainability, and Logistics Support

Robust Fault Diagnosis for a Class of Linear Systems with Uncertainty G99-116

Safety

Experimental Studies of Intent Information on Cockpit Traffic Displays G99-080
Evaluation of Collision Avoidance Maneuvers for Parallel Approach G99-124

Launch Vehicle and Missile (LV/M) Technology

Launch Vehicle and Sounding Rocket Systems

Design Methods for Rocket Attitude Control Systems Subject to Actuator Saturation G99-027

Missile Systems

Full Envelope Missile Autopilot Design Using Gain Scheduled Robust Control G99-013

Simulation

Adaptive Radome Compensation Using Dither G99-006

Trajectories and Tracking Systems

Improved Performance of Recursive Tracking Filters Using Batch Initialization and Process Noise Adaptation G99-104

Vibration

Vibration Confinement in a Generic Launch Vehicle G99-077

Propulsion

Airbreathing Propulsion

Application of Parameter-Dependent Robust Control Synthesis to Turbofan Engines G99-128

Electric and Advanced Space Propulsion

Electric Propulsion for Remote Sensing from Low Orbits G99-045

Space Technology

Aerobraking Flight Mechanics

Optimal Aeroassisted Orbital Interception G99-096

Landers

Direct Adaptive Control for Gravity-Turn Descent G99-056

Mission Design and Analysis

Artificial Lagrange Points for a Partially Reflecting Flat Solar Sail G99-028
Simple Approach to East–West Station Keeping of Geosynchronous Spacecraft G99-115

Mission Trajectories (Earth and Interplanetary)

Simple Strategy for Powered Swingby G99-018
Artificial Lagrange Points for a Partially Reflecting Flat Solar Sail G99-028
Propulsion System Sizing for Orbital Inspection Vehicles G99-057
Two-Body Optimization for Deflecting Earth-Crossing Asteroids G99-063
Initial Adjoint-Variable Guess Technique and Its Application in Optimal Orbital Transfer G99-073
Optimal Aeroassisted Orbital Interception G99-096
Minimum-Fuel Escape from Two-Body Sun-Earth System G99-097
Optimal Low-Thrust Escape Trajectories Using Gravity Assist G99-098
Classification of Out-of-Plane Swing-By Trajectories G99-099
Multiple-Spacecraft Orbit-Transfer Problem: The No-Booster Case G99-100
Multiple-Spacecraft Orbit Transfer Problem: Weak-Booster and Strong-Booster Cases G99-135

Space Processing

Action Selection Algorithms for Autonomous Microspacecraft G99-140

Space Systems

Adaptive Control of Electrically Driven Space Robots Based on Virtual Decomposition G99-047
Multiple Rigid-Body Reorientation Using Relative Motion with Constrained Final System Configuration G99-066
Adaptive Control of Free-Flying Space Robot with Position/Attitude Control System G99-072
Stability and Control of an Atmospheric Tether with a Lifting Probe G99-102

Spacecraft Attitude Determination

Simple Correction Algorithm of Scanning Horizon Sensor Measurement for Earth Oblateness G99-029
Sequential Attitude and Attitude-Rate Estimation Using Integrated-Rate Parameters G99-059
Nonlinear Digital Scheme for Attitude Tracking G99-069
Optimal Combined Reaction-Wheel Momentum Management for Earth-Pointing Satellites G99-083
Pseudolinear and State-Dependent Riccati Equation Filters for Angular Rate Estimation G99-111
Robust Failure Detection for Reentry Vehicle Attitude Control Systems G99-129

Spacecraft Propulsion System Integration

Propulsion System Sizing for Orbital Inspection Vehicles G99-057

Spacecraft Sensor Systems

Simple Correction Algorithm of Scanning Horizon Sensor Measurement for Earth Oblateness G99-029

Spacecraft Test and Evaluation

Independent Analysis of the Space Station Node Modal Test Data G99-002

Structural Mechanics and Materials

Aeroelasticity and Control

Flutter Boundary Prediction Using Physical Models and Experimental Data G99-022
Comparison of μ- and $\mathcal{H}_2$-Synthesis Controllers on an Experimental Typical Section G99-040
Robust Adaptive Control of Store Release Event for Wings with External Stores G99-062
Aeroservoelastic Interaction Between Aircraft Structural and Control Design Schemes G99-079

Dynamic Model Analysis

Efficient Simulation of Motions Involving Coulomb Friction G99-009
New Constraint Stabilization Technique for Dynamic Systems with Nonholonomic Constraints G99-076
Modeling of Variable Length Towed and Tethered Cable Systems G99-091

Flexible and Active Structures

Modelling and Control of a Flexible Structure Incorporating Inertial Slip-Stick Actuators G99-004
Dynamic System Characterization via Eigenvalue Orbits G99-067
Selective Modal Transducers for Piezolaminated Anisotropic Shells G99-068
Dissipator Placement Design for Truss Structures via Balancing Theory G99-085
Validation of an Integrated Modeling Methodology's Closed-Loop Performance Prediction Capability G99-086
Uncertainty Modeling in Aerospace Flexible Structures G99-093
Eigenstructure Assignment Algorithm for Mechanical Second-Order Systems G99-113
Active $\mathcal{H}_\infty$ Control of Sound Radiation from Thin Cylindrical Panels G99-121
Do All Linear Flexible Structures Have Convergent Second-Order Observers? G99-136

Structural Design

Dissipator Placement Design for Truss Structures via Balancing Theory G99-085

Structural Dynamics and Characterization

Independent Analysis of the Space Station Node Modal Test Data G99-002

Structural Modeling

Validation of an Integrated Modeling Methodology's Closed-Loop Performance Prediction Capability G99-086

Structural Optimization

Selective Modal Transducers for Piezolaminated Anisotropic Shells G99-068
Aeroservoelastic Interaction Between Aircraft Structural and Control Design Schemes G99-079

Chronological Index

G98-002 Strapdown Inertial Navigation Integration Algorithm Design Part 1: Attitude Algorithms. Paul G. Savage, *Strapdown Associates, Inc.* (**21**, 1, p. 19) Article
Errata (**22**, 2, p. 384)

G99-001 Practial View of Redundancy Management Application and Theory. Stephen Osder, *Osder Associates* (**22**, 1, p. 12) Article

G99-002 Independent Analysis of the Space Station Node Modal Test Data. Richard S. Pappa, *NASA Langley Reseach Center* (**22**, 1, p. 22) Article

G99-003 Synchronized Formation Rotation and Attitude Control of Multiple Free-Flying Spacecraft. P. K. C. Wang, *University of California, Los Angeles;* and F. Y. Hadaegh and K. Lau, *Jet Propulsion Laboratory, California Institute of Technology* (**22**, 1, p. 28) Article based on AIAA Paper 97-3753 ISBN 1-56347-234-1

G99-004 Modeling and Control of a Flexible Structure Incorporating Inertial Slip-Stick Actuators. A. P. Darby, *University of Oxford, England, UK*; and S. Pellegrino, *University of Cambridge, England, UK* (**22**, 1, p. 36) Article

G99-005 Optimization and Coordination of Multiagent Systems Using Principled Negotiation. John P. Wangermann and Robert F. Stengel, *Princeton University* (**22**, 1, p. 43) Article based on AIAA Paper 96-3853

G99-006 Adaptive Radome Compensation Using Dither. Paul Zarchan, *Charles Stark Draper Laboratory, Inc.*; and Harvey Gratt, *Missile Systems and Technologies, Inc.* (**22**, 1, p. 51) Article based on AIAA Paper 96-3879

G99-007 Autonomous Maneuver Tracking for Self-Piloted Vehicles. David P. Boyle, *University of Sydney, Australia*; and Gregory E. Chamitoff, *NASA Johnson Space Center* (**22**, 1, p. 58) Article
Errata (**22**, 4, p. 624)

G99-008 Bayesian Pattern Matching Technique for Target Acquisition. Neil Gordon, *Defence Evaluation and Research Agency, England, UK*; and David Salmond, *Defence Evaluation and Research Agency, England, UK* (**22**, 1, p. 68) Article

G99-009 Efficient Simulation of Motions Involving Coulomb Friction. Paul C. Mitiguy, *Knowledge Revolution*; and Arun K. Banerjee, *Lockheed Martin Advanced Technology Center* (**22**, 1, p. 78) Article

G99-010 Uncertainty Modeling for Multivariable-Control Robustness Analysis of Elastic High-Speed Vehicles. Frank R. Chavez and David K. Schmidt, *University of Maryland* (**22**, 1, p. 87) Article

G99-011 Simultaneous Guaranteed-Cost Vector-Optimal Performance Design for Collections of Systems. Robert A. Luke, *University of New Mexico* (**22**, 1, p. 96) Article

G99-012 Design of Automatic Landing Systems Using Mixed H_2/H_∞ Control. Shyh-Pyng Shue and Ramesh K. Agarwal, *Wichita State University* (**22**, 1, p. 103) Article

G99-013 Full Envelope Missile Autopilot Design Using Gain Scheduled Robust Control. Harald Buschek, *BGT Bodenseewerk Gerätetechnik GmbH, Germany* (**22**, 1, p. 115) Article based on AIAA Paper 97-3763 ISBN 1-56347-234-1

G99-014 New Design Method for Pulse-Width Modulation Control Systems via Digital Redesign. Tohru Ieko, Yoshimasa Ochi, and Kimio Kanai, *National Defense Academy, Japan* (**22**, 1, p. 123) Article

G99-015 $\mathcal{H}_\infty$ Bounded Fault Detection Filter. Randal K. Douglas and Jason L. Speyer, *University of California, Los Angeles* (**22**, 1, p. 129) Article

G99-016 Optimal Finite Thrust Orbit Transfers with Large Numbers of Burns. Troy Goodson and Jason C. H. Chuang, *Georgia Institute of Technology*; and John Hanson, *NASA Marshall Space Flight Center* (**22**, 1, p. 139) Article

G99-017 Evaluation of the Naval Space Surveillance Fence Performance Using Satellite Laser Ranging. G. Charmaine Gilbreath, *U.S. Naval Research Laboratory*; Paul W. Schumacher Jr., *U.S. Naval Space Command*; Mark A. Davis, *AlliedSignal Aerospace Company*; Edward D. Lydick, *U.S. Naval Space Command*; and John M. Anderson, *U.S. Air Force Research Laboratory* (**22**, 1, p. 149) Article

G99-018 Simple Strategy for Powered Swingby. Lorenzo Casalino, Guido Colasurdo, and Dario Pastrone, *Turin Polytechnic Institute, Italy* (**22**, 1, p. 156) Article

G99-019 Stability Analysis of Baumgarte Constraint Stabilization Technique in Multibody Dynamic Systems. J. C. Chiou, J. Y. Yang, and S. D. Wu, *National Chiao-Tung University, Taiwan, ROC* (**22**, 1, p. 160) Engineering Note

G99-020 Expected Residual Vibration of Traditional and Hybrid Input Shaping Designs. Lucy Y. Pao and Mark A. Lau, *University of Colorado* (**22**, 1, p. 162) Engineering Note

G99-021 Formalized Approach to Obtaining Optimal Coefficients for Coning Algorithms. Chan Gook Park and Kwang Jin Kim, *Kwangwoon University*; and Jang Gyu Lee and Dohyoung Chung, *Seoul National University, Korea* (**22**, 1, p. 165) Engineering Note based on AIAA Paper 96-3736

G99-022 Flutter Boundary Prediction Using Physical Models and Experimental Data. A. Turevskiy, E. Feron, and J. Paduano, *Massachusetts Institute of Technology* (**22**, 1, p. 168) Engineering Note

G99-023 Discrete-Time Optimal Guidance. R. Gitizadeh and I. Yaesh, *Israeli Military Industries, Israel*; and J. Z. Ben-Asher, *Wales, Ltd., Israel* (**22**, 1, p. 171) Engineering Note

G99-024 Gain-Scheduled Control Using Fuzzy Logic and Its Application to Flight Control. Atsushi Fujimori, Hidekazu Tsunetomo, and Zhen-Yu Wu, *Shizuoka University, Japan* (**22**, 1, p. 175) Engineering Note based on AIAA Paper 97-3760 ISBN 1-56347-234-1

G99-025 Windshear Recovery Using Fuzzy Logic Guidance and Control. M. Aznar Fernández-Montesinos, G. Schram, R. A. Vingerhoeds, H. B. Verbruggen, and J. A. Mulder, *Delft University of Technology, The Netherlands* (**22**, 1, p. 178) Engineering Note based on AIAA Paper 97-3629 ISBN 1-56347-234-1

G99-026 Increase and Limit of T_{02} in Super- and Hypersonic Flight. Gottfried Sachs, *Technical University of Munich, Germany* (**22**, 1, p. 181) Engineering Note

G99-027 Design Methods for Rocket Attitude Control Systems Subject to Actuator Saturation. Hyung Don Choi, Hyochoong Bang, and Zeen Chul Kim, *Korea Aerospace Research Institute* (**22**, 1, p. 183) Engineering Note

G99-028 Artificial Lagrange Points for a Partially Reflecting Flat Solar Sail. Colin R. McInnes, *University of Glasgow, Scotland* (**22**, 1, p. 185) Engineering Note

G99-029 Simple Correction Algorithm of Scanning Horizon Sensor Measurement for Earth Oblateness. Jie Li, *Stanford University* (**22**, 1, p. 187) Engineering Note

G99-030 Efficient and Optimal Attitude Determination Using Recursive Global Positioning System Signal Operations. John L. Crassidis, *Texas A&M University*; and E. Glenn Lightsey and F. Landis Markley, *NASA Goddard Space Flight Center* (**22**, 2, p. 193) Article

G99-031 Optimal Strategies for Free-Flight Air Traffic Conflict Resolution. P. K. Menon and G. D. Sweriduk, *Optimal Synthesis, Inc.*; and B. Sridhar, *NASA Ames Research Center* (**22**, 2, p. 202) Article

G99-032 Global Positioning System Integer Ambiguity Resolution Without Attitude Knowledge. John L. Crassidis, *Texas A&M University*; and F. Landis Markley and E. Glenn Lightsey, *NASA Goddard Space Flight Center* (**22**, 2, p. 212) Article

G99-033 Sensitivity of Trajectory Prediction in Air Traffic Management. Michael R. Jackson, *Honeywell Technology Center*; Yiyuan J. Zhao, *University of Minnesota*; and Rhonda A. Slattery, *NASA Ames Research Center* (**22**, 2, p. 219) Article

G99-034 Minimum-Phase Robustness for Second-Order Linear Systems. Jong-Lick Lin and Shin-Ju Chen, *National Cheng-Kung University, Taiwan, ROC*; and Jer-Nan Juang, *NASA Langley Research Center* (**22**, 2, p. 229) Article

G99-035 Sliding Mode Control of Mechanical Systems with Bounded Disturbances via Output Feedback. A. S. Lewis, *Pennsylvania State University Applied Research Laboratory*; and A. Sinha, *Pennsylvania State University* (**22**, 2, p. 235) Article

G99-036 Creating Time-Optimal Commands with Practical Constraints. Timothy D. Tuttle and Warren P. Seering, *Massachusetts Institute of Technology* (**22**, 2, p. 241) Article

G99-037 Model Reduction with a Finite Horizon H_∞ Criterion. M. Bala Subrahmanyam, *U.S. Naval Air Warfare Center*; and Saroj K. Biswas, *Temple University* (**22**, 2, p. 251) Article

G99-038 Nonlinear Projection Filter Based on Galerkin Approximation. Randal Beard, John Kenney, Jacob Gunther, Jonathan Lawton, and Wynn Stirling, *Brigham Young University* (**22**, 2, p. 258) Article

G99-039 On-Orbit Closed-Loop Control Results for the Middeck Active Control Experiment. Mark E. Campbell, *University of Washington*; Jonathan P. How, *Stanford University*; Simon C. O. Grocott, *SPAR Space Systems, Canada*; and David W. Miller, *Massachusetts Institute of Technology* (**22**, 2, p. 267) Article

G99-040 Comparison of μ- and $\mathcal{H}_2$-Synthesis Controllers on an Experimental Typical Section. Jeffrey S. Vipperman, *University of Maine*; Jeffrey M. Barker, *University of Minnesota*; Robert L. Clark, *Duke University*; and Gary J. Balas, *University of Minnesota* (**22**, 2, p. 278) Article

G99-041 Robust Integrated Flight and Propulsion Controller for the Harrier Aircraft. Ian Postlethwaite and Declan G. Bates, *Leicester University, England, UK* (**22**, 2, p. 286) Article based on AIAA Paper 98-4295 ISBN 1-56347-269-4

G99-042 Short-Term Debris Risk to Large Satellite Constellations. Graham G. Swinerd, *University of Southampton, England, UK*; Simon P. Barrows, *The Smith Group, England, UK*; and Richard Crowther, *Defence Evaluation and Research Agency, England, UK* (**22**, 2, p. 291) Article

G99-043 Autonomous Low-Earth-Orbit Determination from Magnetometer and Sun Sensor Data. Mark L. Psiaki, *Cornell University* (**22**, 2, p. 296) Article based on AIAA Paper 98-4308 ISBN 1-56347-269-4

G99-044 Autonomous Orbit Determination for Two Spacecraft from Relative Position Measurements. Mark L. Psiaki, *Cornell University* (**22**, 2, p. 305) Article based on AIAA Paper 98-4560 ISBN 1-56347-272-4

G99-045 Electric Propulsion for Remote Sensing from Low Orbits. M. Guelman and A. Kogan, *Technion—Israel Institute of Technology* (**22**, 2, p. 313) Article

G99-046 Asymmetric Body Spinning Motion with Energy Dissipation and Constant Body-Fixed Torques. Rafael Livneh and Bong Wie, *Arizona State University* (**22**, 2, p. 322) Article

G99-047 Adaptive Control of Electrically Driven Space Robots Based on Virtual Decomposition. Wen-Hong Zhu and Joris De Schutter, *Katholieke Universiteit Leuven, Belgium* (**22**, 2, p. 329) Article

G99-048 Finite Dimensional Optimal Control of Poiseuille Flow. Sanjay S. Joshi, *Jet Propulsion Laboratory, California Institute of Technology*; and Jason L. Speyer and John Kim, *University of California, Los Angeles* (**22**, 2, p. 340) Article

G99-049 Design of Notch Filters for Structural Responses with Multiaxis Coupling. Animesh Chakravarthy, *Aeronautical Development Agency, India*; and Girish Deodhare, Vijay V. Patel, and Amitabh Saraf, *Centre for Artificial Intelligence and Robotics, India* (**22**, 2, p. 349) Article based on AIAA Paper 97-3781 ISBN 1-56347-235-X

G99-050 Treatment of Control Constraints in Finite Element Solution of Optimal Control Problems. Michael S. Warner and Dewey H. Hodges, *Georgia Institute of Technology* (**22**, 2, p. 358) Engineering Note

G99-051 Application of the Nyquist Stability Criterion on the Nichols Chart. Joseph C. Slater, *Wright State University* (**22**, 2, p. 360) Engineering Note

G99-052 Optimal Control and Filtering for Nonstandard Singularly Perturbed Linear Systems. Vojislav Kecman, *University of Auckland, New Zealand*; and Zoran Gajic, *Rutgers University* (**22**, 2, p. 362) Engineering Note

G99-053 Generalized Plants for $\mathcal{H}_\infty$ Robust Controller Design. Koshy George, Jang Gyu Lee, and Bohyung Lee, *Seoul National University, Korea* (**22**, 2, p. 366) Engineering Note

G99-054 Efficient, Near-Optimal Control Allocation. Wayne C. Durham, *Virginia Polytechnic Institute and State University* (**22**, 2, p. 369) Engineering Note

G99-055 Does the Phugoid Frequency Depend on Speed? S. Pradeep, *Indian Institute of Science*; and S. Kamesh, *Aeronautical Development Agency, India* (**22**, 2, p. 372) Engineering Note

G99-056 Direct Adaptive Control for Gravity-Turn Descent. Colin R. McInnes, *University of Glasgow, Scotland, UK* (**22**, 2, p. 373) Engineering Note

G99-057 Propulsion System Sizing for Orbital Inspection Vehicles. Trevor Williams, *University of Cincinnati*; and Sergei Tanygin, *Analytical Graphics, Inc.* (**22**, 2, p. 375) Engineering Note

G99-058 Closed-Form Methods for Generating On–Off Commands for Undamped Flexible Spacecraft. William E. Singhose, *Georgia Institute of Technology*; and Bart W. Mills and Warren P.

Seering, *Massachusetts Institute of Technology* (**22**, 2, p. 378) Engineering Note

G99-059 Sequential Attitude and Attitude-Rate Estimation Using Integrated-Rate Parameters. Yaakov Oshman, *Technion—Israel Institute of Technology*; and F. Landis Markley, *NASA Goddard Space Flight Center* (**22**, 3, p. 385) Article based on AIAA Paper 98-4508 ISBN 1-56347-269-4

G99-060 Two-Timescale-Integration Method for Inverse Simulation. Giulio Avanzini and Guido de Matteis, *Turin Polytechnic Institute, Italy*; and Luciano M. de Socio, *University of Rome "La Sapienza," Italy* (**22**, 3, p. 395) Article based on AIAA Paper 97-0323

G99-061 Adaptive Model Inversion Flight Control for Tilt-Roter Aircraft. Rolf T. Rysdyk and Anthony J. Calise, *Georgia Institute of Technology* (**22**, 3, p. 402) Article based on AIAA Paper 97-3758 ISBN 1-56347-234-1

G99-062 Robust Adaptive Control of Store Release Event for Wings with External Stores. Prasad V. N. Gade and Daniel J. Inman, *Virginia Polytechnic Institute and State University* (**22**, 3, p. 408) Article

G99-063 Two-Body Optimization for Deflecting Earth-Crossing Asteroids. Sang-Young Park and I. Michael Ross, *Naval Postgraduate School* (**22**, 3, p. 415) Article

G99-064 Minimum-Time Low-Thrust Rendezvous and Transfer Using Epoch Mean Longitude Formulation. Jean Albert Kechichian, *The Aerospace Corporation* (**22**, 3, p. 421) Article

G99-065 Spacecraft Vibration Reduction Using Pulse-Width Pulse-Frequency Modulated Input Shaper. Gangbing Song, *University of Akron*; and Nick V. Buck and Brij N. Agrawal, *Naval Postgraduate School* (**22**, 3, p. 433) Article based on AIAA Paper 97-3748 ISBN 1-56347-234-1

G99-066 Multiple Rigid-Body Reorientation Using Relative Motion with Constrained Final System Configuration. David S. Rubenstein, *Charles Stark Draper Laboratory, Inc.*; and Robert G. Melton, *Pennsylvania State University* (**22**, 3, p. 441) Article

G99-067 Dynamic System Characterization via Eigenvalue Orbits. J. Marczyk, J. Rodellar, and A. H. Barbat, *Technical University of Catalonia, Spain* (**22**, 3, p. 447) Article

G99-068 Selective Modal Transducers for Piezolaminated Anisotropic Shells. Scott E. Miller, *Litton Industries*; and Yaakov Oshman and Haim Abramovich, *Technion—Israel Institute of Technology* (**22**, 3, p. 455) Article

G99-069 Nonlinear Digital Scheme for Attitude Tracking. S. Di Gennaro, *Università di L'Aquila, Italy*; S. Monaco, *University of Rome "La Sapienza," Italy*; and D. Normand-Cyrot, *Laboratoire des Signaux et Systèmes, France* (**22**, 3, p. 467) Article

G99-070 Bayesian Approach to Guidance in the Presence of Glint. Neil Gordon, *Defence Evaluation and Research Agency, Malvern, England, UK;* and Angela Whitby, *Defence Evaluation and Research Agency, Farborough, England, UK* (**22**, 3, p. 478) Article

G99-071 Controller Design of Periodic Time-Varying Systems via Time-Invariant Methods. Yung Jae Lee, *DYNACS Engineering Company*; and Mark J. Balas, *University of Colorado* (**22**, 3, p. 486) Engineering Note

G99-072 Adaptive Control of Free-Flying Space Robot with Position/Attitude Control System. Kei Senda, Hideyuki Nagaoka, and Yoshisada Murotsu, *Osaka Prefecture University, Japan* (**22**, 3, p. 488) Engineering Note based on AIAA Paper 97-3557 ISBN 1-56347-234-1

G99-073 Initial Adjoint-Variable Guess Technique and Its Application in Optimal Orbital Transfer. Hui Yan and Hongxin Wu, *Chinese Academy of Space Technology* (**22**, 3, p. 490) Engineering Note based on AIAA Paper 98-4551 ISBN 1-56347-272-4

G99-074 Identifying Helicopter Control Gains Using Desired Output Histories. Keeyoung Choi, *Advanced Rotorcraft Technology* (**22**, 3, p. 492) Engineering Note

G99-075 Solving Control Allocation Problems Using Semidefinite Programming. Jae-Hyuk Oh and Michael B. Jamoom, *Massachusetts Institute of Technology*; Marc W. McConley, *Charles Stark Draper Laboratory, Inc.*; and Eric Feron, *Massachusetts Institute of Technology* (**22**, 3, p. 494) Engineering Note

G99-076 New Constraint Stabilization Technique for Dynamic Systems with Nonholonomic Constraints. S. D. Wu, J. C. Chiou, and J. Y. Yang, *National Chiao Tung University, Taiwan, ROC* (**22**, 3, p. 497) Engineering Note

G99-077 Vibration Confinement in a Generic Launch Vehicle. S. Somanath and S. Pradeep, *Indian Institute of Science*; and A. Barai, *National Aerospace Laboratory, India* (**22**, 3, p. 500) Engineering Note based on AIAA Paper 98-4930 ISBN 1-56347-273-2

G99-078 Gain-Scheduled Linear Fractional Control for Active Flutter Suppression. Jeffrey M. Barker and Gary J. Balas, *University of Minnesota*; and Paul A. Blue, *U.S. Air Force Research Laboratory* (**22**, 4, p. 507) Article

G99-079 Aeroservoelastic Interaction Between Aircraft Structural and Control Design Schemes. Moshe Idan, Mordechay Karpel, and Boris Moulin, *Technion—Israel Institute of Technology, Israel* (**22**, 4, p. 513) Article

G99-080 Experimental Studies of Intent Information on Cockpit Traffic Displays. Richard Barhydt and R. John Hansman Jr., *Massachusetts Institute of Technology* (**22**, 4, p. 520) Article

G99-081 Development of the Probe-and-Drogue Handling Qualities Demonstration Maneuver. David H. Klyde, *Systems Technology, Inc.*; David G. Mitchell, *Hoh Aeronautics, Inc.*; and Kelly J. Latimer, *U.S. Air Force Flight Test Center* (**22**, 4, p. 528) Article

G99-082 Fuel- or Time-Optimal Transfers Between Coplanar, Coaxial Ellipses Using Lambert's Theorem. Chang-Hee Won, *Electronics and Telecommunications Research Institute, Korea* (**22**, 4, p. 536) Article

G99-083 Optimal Combined Reaction-Wheel Momentum Management for Earth-Pointing Satellites. Xiaojiang Chen, Willem H. Steyn, Stephen Hodgart, and Yoshi Hashida, *University of Surrey, England, UK* (**22**, 4, p. 543) Article

G99-084 Model Reduction of Large Space Structures Using Approximate Component Cost Analysis. Sofiene Sidi-Ali-Cherif and Karolos M. Grigoriadis, *University of Houston*; and Murugan Subramaniam, *DYNACS Engineering Company* (**22**, 4, p. 551) Article

G99-085 Dissipator Placement Design for Truss Structures via Balancing Theory. Chien-Chang Lin, *National Chung-Hsing University, Taiwan, ROC*; and Huang-Nan Huang and Fang-Bo Yeh, *Tunghai University, Taiwan, ROC* (**22**, 4, p. 558) Article

G99-086 Validation of an Integrated Modeling Methodology's Closed-Loop Performance Prediction Capability. James William Melody and Gregory Winston Neat, *Jet Propulsion Laboratory, California Institute of Technology* (**22**, 4, p. 566) Article

G99-087 Experiments on Space Robot Arm Path Planning Using the Sensors Database. Toshiaki Iwata, Kenzo Kodama, Fumio

Numajiri, and Hiroshi Murakami, *Electrotechnical Laboratory, Japan* (**22**, 4, p. 573) Article based on AIAA Paper 97-3556 ISBN 1-56347-234-1

G99-088 Implementation of Optimal Guidance Laws Using Predicted Missile Velocity Profiles. Hangju Cho and Chang Kyung Ryoo, *Agency for Defense Development, Korea*; and Min-Jea Tahk, *Korea Advanced Institute of Science and Technology* (**22**, 4, p. 579) Article

G99-089 Adaptive Sliding-Mode Guidance of a Homing Missile. Di Zhou, Chundi Mu, and Wenli Xu, *Tsinghua University, PRC* (**22**, 4, p. 589) Article

G99-090 Robust Control of Nonlinear Systems Using Model-Error Control Synthesis. John L. Crassidis, *Texas A&M University* (**22**, 4, p. 595) Article
Errata (**22**, 6, p. 922)

G99-091 Modeling of Variable Length Towed and Tethered Cable Systems. James W. Kamman, *Western Michigan University*; and Ronald L. Huston, *University of Cincinnati* (**22**, 4, p. 602) Article

G99-092 Feedback Control for Spacecraft Rendezvous and Docking. Craig A. Kluever, *University of Missouri–Columbia* (**22**, 4, p. 609) Engineering Note

G99-093 Uncertainty Modeling in Aerospace Flexible Structures. Dario H. Baldelli and Ricardo S. Sánchez Peña, *Universidad de Buenos Aires, Argentina* (**22**, 4, p. 611) Engineering Note

G99-094 Weighted-Residual Discretization for Uniform Damping and Uniform Stiffening of Structural Systems. Larry Silverberg, *North Carolina State University*; and Gregory Washington, *Ohio State University* (**22**, 4, p. 614) Engineering Note

G99-095 Horizontal Control Effector Sizing for Supersonic Transport Aircraft. Eric Hallberg and Isaac Kaminer, *Naval Postgraduate School* (**22**, 4, p. 618) Engineering Note

G99-096 Optimal Aeroassisted Orbital Interception. Kazuhiro Horie and Bruce A. Conway, *University of Illinois at Urbana–Champaign* (**22**, 5, p. 625) Article

G99-097 Minimum-Fuel Escape from Two-Body Sun-Earth System. Guido Colasurdo and Lorenzo Casalino, *Politecnico di Torino, Italy*; and Elena Fantino, *Universitá di Padova, Italy* (**22**, 5, p. 632) Article

G99-098 Optimal Low-Thrust Escape Trajectories Using Gravity Assist. Lorenzo Casalino, Guido Colasurdo, and Dario Pastrone, *Politecnico di Torino, Italy* (**22**, 5, p. 637) Article

G99-099 Classification of Out-of-Plane Swing-By Trajectories. Gislaine de Felipe and Antonio Fernando Bertachini de Almeida Prado, *National Space Research Institute, Brazil* (**22**, 5, p. 643) Article
Errata (**22**, 6, p. 922)

G99-100 Multiple-Spacecraft Orbit-Transfer Problem: The No-Booster Case. Cesar A. Ocampo and George W. Rosborough, *University of Colorado* (**22**, 5, p. 650) Article

G99-101 Floquet Approximation for a Nearly Axisymmetric Rigid Body with Constant Transverse Torque. R. Anne Gick, Marc H. Williams, and James M. Longuski, *Purdue University* (**22**, 5, p. 658) Article

G99-102 Stability and Control of an Atmospheric Tether with a Lifting Probe. Brian Biswell and Jordi Puig-Suari, *Arizona State University* (**22**, 5, p. 664) Article

G99-103 System Identification and Adaptive Steering of Tractors Utilizing Differential Global Positioning System. Andrew Rekow, Thomas Bell, David Bevly, and Bradford Parkinson, *Stanford University* (**22**, 5, p. 671) Article

G99-104 Improved Performance of Recursive Tracking Filters Using Batch Initialization and Process Noise Adaptation. Michael E. Hough, *MITRE Corporation* (**22**, 5, p. 675) Article

G99-105 Time-Optimal Control of Axisymmetric Rigid Spacecraft Using Two Controls. Haijun Shen and Panagiotis Tsiotras, *Georgia Institute of Technology* (**22**, 5, p. 682) Article based on AIAA Paper 98-4328 ISBN 1-56347-269-4

G99-106 Robustness Analysis of Neural Networks with an Application to System Identification. K. KrishnaKumar and K. Nishita, *University of Alabama* (**22**, 5, p. 695) Article

G99-107 Off-Line Comparison of Classical and Robust Flight Simulator Motion Control. Moshe Idan and Meyer A. Nahon, *Technion—Israel Institute of Technology* (**22**, 5, p. 702) Article

G99-108 Synthesis of Nonlinear Controller to Recover an Unstable Aircraft from Poststall Regime. Amitabh Saraf and Girish Deodhare, *Centre for A.I. and Robotics, India*; and Debasish Ghose, *Indian Institute of Science* (**22**, 5, p. 710) Article based on AIAA Paper 98-4206 ISBN 1-56347-269-4

G99-109 Unified Approach for Roll Ratcheting Analysis. R. Koehler, *DLR, German Aerospace Research Center* (**22**, 5, p. 718) Engineering Note

G99-110 Linear Quadratic Optimality of Infinite Gain Margin Controllers. C. R. Ashok kumar, *North Carolina A&T State University* (**22**, 5, p. 720) Engineering Note

G99-111 Pseudolinear and State-Dependent Riccati Equation Filters for Angular Rate Estimation. Richard R. Harman, *NASA Goddard Space Flight Center*; and Itzhack Y. Bar-Itzhack, *Technion—Israel Institute of Technology* (**22**, 5, p. 723) Engineering Note

G99-112 Adaptive Two-Step Filter with Applications to Bearings-Only Measurement Problem. Di Zhou, Chundi Mu, and Wenli Xu, *Tsinghua University, PRC* (**22**, 5, p. 726) Engineering Note based on AIAA Paper 98-4313 CP9807

G99-113 Eigenstructure Assignment Algorithm for Mechanical Second-Order Systems. Youdan Kim and Hee-Seob Kim, *Seoul National University, Republic of Korea*; and John L. Junkins, *Texas A&M University* (**22**, 5, p. 729) Engineering Note

G99-114 Design Technique for a Linear System with an Amplitude-Constrained Actuator. Anhtuan D. Ngo and Uy-Loi Ly, *University of Washington* (**22**, 5, p. 731) Engineering Note

G99-115 Simple Approach to East–West Station Keeping of Geosynchronous Spacecraft. T. S. No, *Chonbuk National University, Republic of Korea* (**22**, 5, p. 734) Engineering Note

G99-116 Robust Fault Diagnosis for a Class of Linear Systems with Uncertainty. Bin Jiang, Jian Liang Wang, and Yeng Chai Soh, *Nanyang Technological University, Republic of Singapore* (**22**, 5, p. 736) Engineering Note

G99-117 Band-Limited Actuator and Sensor Selection for Disturbance Rejection. Robert L. Clark, *Duke University*; and David E. Cox, *NASA Langley Research Center* (**22**, 5, p. 740) Engineering Note

G99-118 Catalog Maintenance of Low-Earth-Orbit Satellites: Principles of the Algorithm. Zakhary N. Khutorovsky, Vladimir F. Boikov, and Lev N. Pylaev, *"Vympel" International Corporation, Russia* (**22**, 6, p. 745) Survey Paper

G99-119 Attitude Commands Avoiding Bright Objects and Maintaining Communication with Ground Station. Hari B. Hablani, *The Boeing Company* (**22**, 6, p. 759) Article

G99-120 Spacecraft Spin Stabilization Using a Transverse Wheel for Any Inertia Ratio. Richard A. Fowell, Richard I. Milford, and John F. Yocum, *Hughes Space and Communications Company* (**22**, 6, p. 768) Article based on AIAA Paper 98-4434 ISBN 1-56347-269-4

G99-121 Active $\mathcal{H}_\infty$ Control of Sound Radiation from Thin Cylindrical Panels. Moshe Idan, Baruch Pletner, and Tanchum Weller, *Technion—Israel Institute of Technology* (**22**, 6, p. 776) Article

G99-122 Regulation About Time-Varying Trajectories: Precision Entry Guidance Illustrated. Ping Lu, *Iowa State University* (**22**, 6, p. 784) Article

G99-123 Longitudinal Landing Control Law for an Autonomous Reentry Vehicle. Yoshikazu Miyazawa and Toshikazu Motoda, *National Aerospace Laboratory, Japan*; Tatsushi Izumi, *National Space Development Agency of Japan*; and Takashi Hata, *Mitsubishi Heavy Industries Company, Ltd., Japan* (**22**, 6, p. 791) Article based on AIAA Paper 98-4428

G99-124 Evaluation of Collision Avoidance Maneuvers for Parallel Approach. Lee F. Winder and James K. Kuchar, *Massachusetts Institute of Technology* (**22**, 6, p. 801) Article

G99-125 Trajectory Estimation of Reentry Vehicles by Use of On-Line Input Estimator. Sou-Chen Lee and Cheng-Yu Liu, *Chung Cheng Institute of Technology, Taiwan, ROC* (**22**, 6, p. 808) Article

G99-126 Feedback Control for Slew Maneuver Using On–Off Thrusters. Hyochoong Bang, Youngwoon Park, and Jungyoup Han, *Korea Aerospace Research Institute*; and Han Hwangbo, *Korea Telecom* (**22**, 6, p. 816) Article

G99-127 Robust Stability of Mode-to-Mode Fuzzy Controllers. Freeman Rufus and George Vachtsevanos, *Georgia Institute of Technology* (**22**, 6, p. 823) Article

G99-128 Application of Parameter-Dependent Robust Control Synthesis to Turbofan Engines. Gregory Wolodkin, Gary J. Balas, and William L. Garrard, *University of Minnesota* (**22**, 6, p. 833)

G99-129 Robust Failure Detection for Reentry Vehicle Attitude Control Systems. Ramses M. Agustin, *Massachusetts Institute of Technology*; and Rami S. Mangoubi, Roger M. Hain, and Neil J. Adams, *Charles Stark Draper Laboratory* (**22**, 6, p. 839) Article

G99-130 Optimal Reduced-Order Estimators for Parameter-Dependent Systems. Alina Zlochevsky and Yoram Halevi, *Technion—Israel Institute of Technology* (**22**, 6, p. 846) Article

G99-131 Aircraft Handling Qualities and Pilot-Induced Oscillation Tendencies with Actuator Saturation. Yasser Zeyada, Ronald A. Hess, and Wichai Siwakosit, *University of California* (**22**, 6, p. 852) Article based on AIAA Paper 98-4334 ISBN 1-56347-270-8

G99-132 Low-Authority Controller Design by Means of Convex Optimization. Arash Hassibi, Jonathan P. How, and Stephen P. Boyd, *Stanford University* (**22**, 6, p. 862) Article

G99-133 Multiple Timescale Flight Control Using Reconfigurable Sliding Modes. Y. Shtessel, *University of Alabama in Huntsville*; and J. Buffington and S. Banda, *U.S. Air Force Research Laboratory* (**22**, 6, p. 873) Article based on AIAA Paper 97-3632 ISBN 1-56347-234-1

G99-134 Unified Design for H_2, H_∞, and Mixed Control of Spacecraft. Charng-Shi Wu and Bor-Sen Chen, *National Tsing Hua University, Taiwan, ROC*; and Ying-Wen Jan, *National Space Program Office, Taiwan, ROC* (**22**, 6, p. 884) Article

G99-135 Multiple-Spacecraft Orbit Transfer Problem: Weak-Booster and Strong-Booster Cases. Cesar A. Ocampo and George W. Rosborough, *University of Colorado* (**22**, 6, p. 897) Article

G99-136 Do All Linear Flexible Structures Have Convergent Second-Order Observers? Mark J. Balas, *University of Colorado* (**22**, 6, p. 905) Engineering Note

G99-137 Time-Domain Identification of Low-Order Models for Flexible Structures. Robert J. Bauer, *Dalhousie University, Canada*; and Peter C. Hughes, *University of Toronto, Canada* (**22**, 6, p. 908) Engineering Note

G99-138 Resonated Libration of Tethered Subsatellite by Atmospheric Density Variation. Kentaroh Kokubun, *Ship Research Institute, Japan* (**22**, 6, p. 910) Engineering Note

G99-139 Worst-Case Control for Discrete-Time Uncertain Nonlinear Systems. Peng Shi, *University of South Australia*; and Shyh-Pyng Shue and Ramesh K. Agarwal, *Wichita State University* (**22**, 6, p. 911) Engineering Note based on AIAA Paper 97-3771 ISBN 1-56347-234-1

G99-140 Action Selection Algorithms for Autonomous Microspacecraft. E. A. Gillies, A. G. Y. Johnston, and C. R. McInnes, *Glasgow University, Scotland, UK* (**22**, 6, p. 914) Engineering Note

G99-141 Effects of Planar Thrust Misalignments on Rigid Body Motion. Daniel Levy de F. Rodrigues and Marcelo Lopes de O. e Souza, *National Institute for Space Research, Brazil* (**22**, 6, p. 916) Engineering Note

G99-142 Generalized Canonical Systems Applications to Optimal Trajectory Analysis. Sandro da Silva Fernandes, *Instituto Tecnológico de Aeronáutica, Brazil* (**22**, 6, p. 918) Engineering Note
